

Daily Health Check for Parents

Updated September 22, 2020

Key Symptoms of Illness:

Does your child have any of the following symptoms?	Circle One	
Fever	YES	NO
Chills	YES	NO
Cough or worsening chronic cough	YES	NO
Shortness of breath	YES	NO
Loss of sense of smell or taste	YES	NO
Diarrhea	YES	NO
Nausea and vomiting	YES	NO

Stay Home When New Symptoms of Illness Develop

Students and staff should stay at home when new symptoms of illness develop. The key symptoms to watch for are fever, chills, cough, shortness of breath, loss of sense of smell or taste, nausea, vomiting and diarrhea.

If you answered “YES” to one of the questions included under ‘Key Symptoms of Illness’ (excluding fever), you should stay home for 24 hours from when the symptom started. If the symptom improves, you may return to school when you feel well enough. If the symptom persists or worsens, seek a health assessment.

If you answered “YES” to two or more of the questions included under ‘Symptoms of Illness’ or you have a fever, seek a health assessment. A health assessment includes calling 8-1-1, or a primary care provider like a physician or nurse practitioner. If a health assessment is required, you should not return to school until COVID-19 has been excluded and your symptoms have improved.

When a **COVID-19 test is recommended** by the health assessment:

- If the COVID-19 test is **positive**, the person should stay home until they are told by public health to end their self-isolation. In most cases this is 10 days after the onset of symptoms. Public health will contact everyone with a positive test.
- If the COVID-19 test is **negative**, the person can return to school once symptoms have improved and they feel well enough. Symptoms of common respiratory illnesses can persist for a week or more. Re-testing is not needed unless the person develops a new illness. **BCCDC** has information on receiving negative test results.
- If a COVID-19 test is **recommended but is not done** because the person or parent chooses not to have the test or a health assessment is not sought when recommended, and the person’s symptoms are not related to a previously diagnosed health condition, they should stay home from school until 10 days after the onset of symptoms, and then may return if feeling well enough.

If a **COVID-19 test is not recommended** by the health assessment, the person can return to school when symptoms have improved and they feel well enough. Testing may not be recommended if the assessment determines that the symptoms are due to another cause (i.e. not COVID-19).

Stay Home When Required to Self-Isolate

The following students, staff or other persons **must stay home and self-isolate**:

- A person confirmed by public health as a case of COVID-19; or
- A person confirmed by public health as a close contact of a confirmed case or outbreak of COVID-19; or
- A person who has travelled outside of Canada in the last 14 days

Anyone required to self-isolate will be supported by public health. Additional information is available from **BCCDC**.
